extracellular structure organization

cilium movement axoneme assembly
microtubule bundle formation
epithelial cilium movement involved in extracellular fluid movement
cilium organization sperm motility
microtubule-based movement

microtubule-based movement respiratory system process cilium or flagellum-dependent cell motility

cilium movement involved in cell motextracellular transport cilium asspande respiratory gaseous exchange by respiratory system cilium—dependent cell motility sperm axoneme assembly sperm flagellum assembly mucociliary clearance

germ cell development cellular process involved in reproduction in multicellular organism spermatid differentiation cerebrospinal fluid circulation
